

**Pre-banquet lecture by acclaimed Engineering Professor and  
Philosopher Theodosios Tassios on the topic  
“Technology in Ancient Greece”**

Theodosios Tassios is a Professor of the National Technical University of Athens (NTUA), Member of the Academy of Sciences of Turin (Italy), doctor honoris causa of Liege University, of University of Nanjing and the Democritus University. He served as expert and consultant of United Nations organizations and of the European Union, as well as President of international scientific organizations. He is honorary President of the Hellenic Society of Philosophy, and President of the Society for the Study of Ancient Greek Technology. He has published 370 scientific papers and 40 books in different languages.

We hope that you will enjoy the talk by Prof. Tassios, who is a legendary figure in Greece and a fascinating speaker. We have opened up this talk to the public of Kalamata, so be ready to mingle with the locals during the **pre-lecture reception**, featuring a selection of local wines, soft drinks and appetizers.
